# Gladiolus Price List

SEASON 1928

The  
Three  
A's

Quality of Bulb  
Quality of Bloom  
Quality of Variety

**FOREWORD.** Once again I present to you my Salesman, and I trust you will take kindly to his offerings of choice gladiolus bulbs.

You will note upon looking over this list that most of the descriptions of the varieties are my own, such as I have found them in my garden or as I have seen them thru my eyes. Tastes differ, so you may not always agree with me and you probably will be right. I am calling your attention to the fact that these are *merely my opinions*. Nearly all glads have some faults. If they didn't, they would all rate at 100% and perfection would have been reached. Some of us overlook some of the faults if a glad is of real beautiful color, others see only such things as tall growth, good placement or substance and are willing to overlook the fact that the color is poor. Therefore much depends on how you look at a glad or what you consider most important in a fine variety.

I have never yet made out a Price List and felt that the price on every variety was absolutely correct. There seems to be no such thing as a standard price on glads. It is part of my business to keep tabs on the prices and I try to strike an average price of what other reliable growers are charging. If I have failed in my endeavor to do this, write me and I'll make it right. After all, its not so much what you pay for a variety, its what you get for your money, that counts!

The past season has been one of abundant rainfall in New England, so that I have a fine crop of quality bulbs, grown in this hardy New England climate, in the rich Connecticut river valley soil. I am sure the bulbs will please you.

A few of my seedlings will be released next season, and I just want to remind you that I have taken into consideration the marked improvements made in glads the past few years and promise you only something really worth while.

I welcome small orders, even if only for one bulb. Don't get the idea that the big ones aren't welcome too.

Order Early! Every season some varieties are sold out. You stand a better chance of having your order filled in full by sending it in now. 25% deposit will hold order for future delivery.

Read'em and Smile. I suppose it is only human nature to like to have your customers write you letters, saying how pleased they are with your bulbs. I've always had a hankering to print a few of these letters, but my crowded space forbids it, however just to satisfy myself on this score the least mite, I quote the following just received. "Dear Mr. A. "You may think me either unappreciative or crazy! Because for the life of me can I remember whether or not I've acknowledged receipt of order; if I haven't, you must think me ungrateful. If I have you would be justified in doubting my sanity! But I don't care; the way you filled my order is worthy of a double portion of thanks anyhow. Never have I been more pleased with an order; and I have been generously treated indeed by some of the growers." T. V. B."

**TERMS.** Cash with order, delivery prepaid. No substitution of varieties. Extra count. **No orders taken for bulblets after April 1st.** Orders filled in the same rotation as received.

**DISCOUNTS.** On orders of \$10.00 and up to \$100.00 when cash accompanies order you may select an additional 10% of the amount of your order (your selection of varieties from the "General" list). On orders over \$100.00 write for special quotations for entire lot.

**WARRANTY.** I exercise great care to have everything true to name and believe everything listed here to be 100% true, however, should stock prove untrue or otherwise unsatisfactory, my liability to cease upon free replacement or refund of purchase price, but, I won't be satisfied until you are.
